

LEJONKLOU SAGATUN MONO 1.7 PREAMP

Lejonklou Sagatun Mono 1.7 Preamp – clean, simple, versatile, easy to use, and unfailingly musical. Front panel and remote control (included) operation.

- The most engaging and musical preamplifier we have experienced
- Line-stage preamp designed from the front-end back to retain as much of the musical signal as possible
- The Sagatun Mono circuit combines very short signal paths with high speed and high reliability components
- Components carefully selected for the most musical performance after extensive listening tests. Precise matching of critical components
- Dual Switch Mode power supplies with custom upgrades and trimming
- Four inputs plus special direct fifth input with even better performance
- Exclusive, Lejonklou-designed volume color-change display for clear feedback and superb musical performance and control syncing system for multiple units
- Simple, strong all aluminum casework with a hardwearing black speckle finish
- Very reasonably priced for their exceptional performance
