

## LEJONKLOU TUNDRA MONO 3 POWER AMPLIFIER

The Lejonklou Tundra Mono 3 Power amplifier is the new version of our clean, simple and, above all, musically engaging amplifiers.

- Complete redesign featuring new, improved main board with superior shielding and layout, more musical output devices and TIM, upgraded PS units and grounding
- Designed from the front-end back to retain as much of the musical signal as possible the Tundra circuit combines very short signal paths with high speed and high reliability components and a customer adjustable power supply trimming circuit for best performance
- Components carefully selected for the most musical performance after extensive listening tests with precise matching of critical components including new output transistors
- Customized Dual Switch Mode power supplies with voltage trim (meter included)
- Unique, Lejonklou-designed Class A/B output stage with a 1.1kg pure copper heatsink
- The moderate power rating (40W continuous 8 Ohms, 70W 4 Ohms) belies the ability of the Tundra Mono 3 to play music with great authority
- Simple, clean, all-aluminum casework with a hardwearing black speckle finish
- Very reasonably priced for the exceptional performance
